DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "the stator windings of one phase being wound around every two stator main poles among the 6m pieces of the stator main pole" is not understood. According to the specification, the main poles are 22-1 through 22-6, for a total of six main poles. "Every two stator main poles" would seem to mean every possible combination of any two of those six poles. Those combinations are not shown by the drawings. Figure 1 shows a single phase wound around a pole and the pole on the stator directly opposite the first pole. Clarification is required.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 2 and 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Sakamoto cases are all by the Applicant of the instant invention and are not prior art. These references have been checked for possible double patenting problems. The cited

references in these patents are not cited here because the novelty claimed in this case relating to the rotor poles is not discussed in the earlier cited references.
